

KOJONUP FEEDS
WHERE QUALITY COUNTS

**UNIVERSAL STARTER
PELLETS**

BULK STARTER PELLETS

- These 6mm pellets contain the minimum requirements of vitamins and minerals to maintain optimum growth. It is important that good quality drinking water be readily accessible to stock at all time.
- We source the best natural ingredients from farmers in Western Australia.
- We believe the best way to supply the vital nutrients and energy animals need is through a natural product. Minimal processing ensures our ingredients keep their natural goodness.

NUTRITIONAL ANALYSIS

Crude Protein 18.5%
Metabolisable Energy 10.0 MJ/Kg

TYPICAL INGREDIENTS

May contain a selection of the following due to seasonal variations: Oat hulls, Barley, Wheat, Lupins.

Contains Vitamin, Macro-mineral and Trace element Premix.

STORAGE INSTRUCTIONS

Store in dry, cool and clean place. Protect from insects and vermin. When stored under appropriate conditions best used within 6 months from manufacture.

FEEDING GUIDE

- KF Starter Pellets are designed for introducing sheep or lambs to KF Lamb Finisher Pellets in a feedlot. This can be in self-feeders or fed as a trail.
 - Starter Pellets can also be used to meet more moderate levels of performance such as deferral feeding of mature sheep; recommended rate of feeding will depend on the desired level of performance and the nature of any complementary feed-base.
 - Adequate good quality drinking water should be available.
